Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PROCEEDINGS

OF THE

AMERICAN ACADEMY

OF

ARTS AND SCIENCES.

NEW SERIES.
VOL. III.

WHOLE SERIES.
VOL. XI.

FROM MAY, 1875, TO MAY, 1876.

SELECTED FROM THE RECORDS.

BOSTON:
PRESS OF JOHN WILSON AND SON.
1876.

CONTENTS.

PAGE

I. *Researches on the Hexatomic Compounds of Cobalt.* By Wolcott Gibbs, M.D. 1

II. *On the Solar Motion in Space and the Stellar Distances.* By Truman Henry Safford 52

III. *On the Veiled Solar Spots.* By L. Trouvelot 62

IV. *On Photographs of the Solar Spectrum.* By Robert Amory, M.D. 70

V. *Miscellaneous Botanical Contributions.* By Asa Gray . 71

VI. Botanical Contributions. By Sereno Watson : —
1. *On the Flora of Guadalupe Island* 105
2. *List of a Collection of Plants from Guadalupe Island, made by Dr. Edward Palmer, with his Notes upon them* 112
3. *Descriptions of New Species of Plants, chiefly Californian, with Revisions of certain Genera* . . . 121

VII. *Specimens of Milk from the Vicinity of Boston.* By S. P. Sharples, S.B. 149

VIII. *On Portable Astronomical Instruments and their Use.* By Truman Henry Safford 157

IX. *On some Physical Observations of the Planet Saturn* By L. Trouvelot 174

X. *The Companions of Procyon.* By Rear-Admiral C. H. Davis 185

XI. *Notes on Magnetic Distribution.* By Henry A. Rowland. 191

XII. *On the Method of Least Squares.* By Truman Henry Safford 193

XIII. Brief Contributions from the Physical Laboratory of Harvard College. By John Trowbridge : —
4. *On the Effect of Thin Plates of Iron used as Armatures to Electro-Magnets* 202
5. *On the so-called Etheric Force* 206
6. *On a New Form of Mirror Galvanometer* 208

XIV. *On the Solar Motion and the Stellar Distances.* By Truman Henry Safford 210

PAGE

XV. Contributions from the Physical Laboratory of Harvard College : —
8. *On the Induction Spark produced in Breaking a Galvanic Circuit between the Poles of a Magnet.* By B. O. Peirce, Jr. 218

XVI. Contributions from the Physical Laboratory of Harvard College : —
9. *Condensers and Geissler's Tubes.* By William P. Wilson 228

XVII. *On Viviparous Echini from the Kerguelen Islands.* By Alexander Agassiz 231

XVIII. *On a Possible Explanation of the Method employed by Nobert in Ruling his Test Plates.* By William A. Rogers 237

XIX. *Mountain Surveying.* By Prof. E. C. Pickering. . . 256

XX. *Height and Velocity of Clouds.* By Prof. E. C. Pickering 263

XXI. Contributions from the Physical Laboratory of the Massachusetts Institute of Technology : —
8. *An Experimental Proof of the Law of Inverse Squares for Sound.* By William W. Jacques 265
9. *Diffraction of Sound.* By William W. Jacques 269
10. *Comparison of Prismatic and Diffraction Spectra.* By Prof. E. C. Pickering 273

XXII. *On Photographs of the Solar Spectrum.* By Robert Amory, M.D. 279

XXIII. *A New Form of Induction Apparatus.* By Henry P. Bowditch 281

XXIV. *Hydrographic Sketch of Lake Titicaca.* By Alexander Agassiz 283

XXV. Contributions from the Physical Laboratory of Harvard College : —
10. *Distribution of Magnetism on Armatures.* By Harold Whiting 293

XXVI. Contributions from the Physical Laboratory of Harvard College : —
11. *Change of Electrical Resistance in Wires by Stretching.* By George S. Pine 303
